

ICT YEAR 7 – What we will be learning in ICT this term

Spring term - All students will be learning how to stay safe online and how to prevent problems caused by viruses, spyware, malware and phishing. Parents can help with this topic by:

- Encouraging conversations on staying safe online and discussing why it is so important not to share personal information online and what could be the consequences for doing so.
- When researching information on websites encouraging your child to cross-reference the information to check to make sure the website is valid and reliable.
- Helping your child to understand how to correctly use the safety settings in a web browser.

Spring
