Dear Parents and Carers,

Pupil Progress App

I am writing to make you aware of how we share details of your children's progress with you. The school uses the Pupil Progress system which allows us to match our reporting exactly to exam board course specifications for all subjects, making our forecast of future grades in final exams as evidence based as possible.

Pupil Progress has developed a new smartphone App for parents which will allow us to share reports directly with you through your phone. The reports will show which specific areas of their courses a student is already performing well in, and those areas where they can improve.

All steps have been taken to ensure that all of your and your children's personal data are safe and secure at all times, and that all use of data is fully compliant with data protection legislation and school policy. Information about how Pupil Progress will process data can be found at: [Pupil Progress App Data Processing Information](#)

The trust data protection policy can be found at:

[CET Data Protection Policy](#)

You can see more information about what Parent App is and how it works, and the answers to some Frequently Asked Questions at:

[Pupil Progress App Help Guide](#)

and

[Pupil Progress Parent Guide](#)

If you have any other questions or if you wish to opt out of using the App, just let us know.

The steps to start using the app are as follows:

1. Download the app on your smartphone:
For Apple iPhones: tap [here](#) to download the app
Or for Android phones: tap [here](#) to download the app
2. You will receive another email with the subject "The Hart School has invited you to register for the Pupil Progress Parent App".
 - a. You need to **open that email on the smartphone you have already installed the app on and tap the link in the email.**
 - b. You will be taken to a screen to create a password for yourself in the app.

- c. You will then be sent a verification code to your email address which you will need to find in your emails and enter in the app.
- d. Finally, you will need to enter your child's date of birth to verify your account.

We look forward to sharing this new powerful insight into your child/children's progress with you.

Yours sincerely,

L. Hallam
