Dear Parent/Carer

GCSE Statistics

Your child has been selected to take GCSE Statistics as an additional GCSE qualification this summer. The content overlaps heavily with GCSE Mathematics and your child has been selected as they are secure with their maths grade and have the potential to achieve highly in an additional maths-based GCSE.

GCSE Statistics focuses on the real life application of statistical models. It looks at: critiquing data; the statistical model and analysing data to a deeper level. Through taking GCSE Statistics, students will gain a deeper understanding of the statistics content in the GCSE Maths paper. The content covered will also support students with further studies at A-Level in subjects which rely on statistics.

We will provide additional resources in order to prepare them for the exam. The small amount of additional content will be taught during an intensive workshop day. Additional intervention sessions will be held during the Easter Holiday. Content will be purely based on the statistics content.

This is a fantastic opportunity for your child and will deepen and support them with a variety of A Levels and GCSEs which rely heavily on statistics. If you have any questions regarding the qualification, I can be contacted by email: jodie.green@hartschool.org.uk

Yours sincerely

Miss J Green
Director of Faculty - Maths
